SUMMARY

Creative Technologist and full-stack developer who builds software for the rooms I stand in — from a 25-year culinary career into engineering, product, and AI. I take systems apart, understand them, and build them back better: React/TypeScript front ends, Python back ends, and blockchain apps shipped at hackathons from Harvard to Solana. Bilingual (EN/PT), remote-ready.

EXPERIENCE

English Mentor & EdTech Developer — Mister Wiz English School

2026 – Present

Brazil

- Mentor English learners while building the pedagogic tools the school runs on.
- Built the school's digital ecosystem: teacher dashboard (Flask on Railway), a student report compiler, a gamified quiz app, and landing page.
- Automated reporting — teacher-filled CSVs become print-ready report cards with per-skill radar charts.

Software Product Manager — metaCAMPUS

Dec 2025 – Present

Remote

- Operate across product, UX, and engineering to define scope, requirements, and delivery priorities.
- Contribute to architecture, security, and documentation for a blockchain transcript-verification platform on Algorand.

AI Trainer / UX Evaluator — Alignerr

Sep – Dec 2025

Freelance

- Trained and evaluated large language models for accuracy, safety, and alignment.
- Designed datasets focused on reasoning quality, cybersecurity, and UX clarity.

Executive Chef / Internal Product Builder — Dennis Yacht Club

2023 – 2025

Massachusetts

- Built internal software (ChefCalc, ChefTrack) to digitize inventory, pricing, and workflows.
- Improved scheduling, forecasting, and team coordination by ~30% through automation.
- Led a team of 6 and executed events for 200+ guests.

Full-Stack Developer / UX Designer — Freelance

2018 – 2024

Remote

- Designed, built, and maintained custom web apps for small businesses and founders.
 - Modernized legacy systems — improving usability, performance, accessibility, and SEO.
 - Implemented authentication, dashboards, API integrations, and automated workflows.
-

SELECTED PROJECTS

soundChain — Decentralized music marketplace with membership NFTs and on-chain royalties (Algorand, PyTeal).

Mister Wiz Ecosystem — EdTech platform: report compiler, teacher dashboard, and gamified quiz app (Python, Flask, PostgreSQL).

theVault — Document-ownership DApp proving ownership on-chain across Algorand and Stacks.

CNPJ Lookup — Full-stack business lookup — Vue 3, Laravel, Dockerized, with Playwright/Lighthouse tests.

Hackathons — Harvard 2024, Polkadot 2025, Stacks, Solana.

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind, Vite, HTML/CSS

Backend: Python, Node.js, Flask, Django, SQL, PHP

Blockchain: Algorand (AlgoKit, PyTeal), Stacks, Solana, IPFS

Design/UX: Figma, design systems, user research, WCAG accessibility

DevOps & AI: GitHub, CI/CD, Docker, Vercel, Firebase, model evaluation, prompt engineering

EDUCATION & CERTIFICATIONS

Google Cybersecurity Professional Certificate · IBM Technical Support Professional Certificate

Google UX Design Professional Certificate · CS50x + CS50 Python/Web/AI (Harvard)

Associate of Arts — Cape Cod Community College · Full-Stack Web Development Bootcamps
